

Game for 4 to 6 players/teams

Material :

- Cards with questions for each theme (we have to mix 2 themes to reach 6 themes)
  - Our World
  - Health
  - Climate change
  - Resources
  - Equality
  - Working together
- a 6 faces dice
- a pack of 6 triangles for 6 teams/players
- 6 game pawns

Each player or team has a corresponding game pawn

Players begin in the middle of the board. The player who gets the biggest result by rolling the dice, will begin.

Players can take one of six different paths out of the center of the board, which spread out like spokes on a wheel.

After rolling the dice, the player answers the question which belongs to the color theme and which is read by the other teams or players. If the answer is correct they can play again. If they land on "roll again" space, they...."roll again" and play.

When someone correctly answers a question on a color coded triangle piece, then that person gains a triangle of this color. A player must win one triangle of each color to proceed to the final phase of the game. Therefore, the player must collect 6 triangles before the endgame scenario starts.

When this is accomplished, the player must answer one more question to win the game.
